SKILLS

Programming Languages: C, C++, Python
Embedded Linux: Yocto, OpenBmc, Kernel, Device Tree, Driver, and Application Development, LVGL
Microcontroller: STM32 Platform, I2C, GPIO, UART, SPI, Super-Loop Architecture
Development Tools: Git, GitHub Actions, Agile / Jira

EXPERIENCE

Embedded Software Engineer I May 2024 - Present
Accelsius Austin, Texas

- Collaborated with a team of developers to design and develop the full software and firmware stack.
- Developed System Controls on an STM32 Super-Loop Architecture ensuring safe operation and thermodynamically optimal 2 phase cooling.
- Performed Sensor Bring-up for a variety of sensors and system feedback IO including temperature, pressure, level, ADCs, pumps, and continuous control valves.
- Designed communications between STM32 and Aspeed2600 implementing custom parsers and message packets using I2C.
- Worked on custom Linux image with custom services for real-time reporting of 100+ system sensors and faults data points via Redfish and a User-interface using LVGL.
- Led client and investor demonstrations, leveraging comprehensive knowledge of multidisciplinary engineering decisions to effectively communicate technical concepts and system capabilities.

IT Administrator and Operations Manager March 2020 – April 2024
dkCrew, LLC Splendora, Texas

- Maintained the organization's IT environment, supported users, ensured data security, and contributed to the strategic planning and execution of IT initiatives.

Engineering Intern Summers of 2017, 2020, and 2021
Genesis Dimensions Houston, Texas

- Successfully implemented Taiga, an open-source Agile project management tool, on on-premises servers.
- Assisted in the manufacturing and integration of industrial control panels for a Kuka Robot and a Material Flow Control System.

Engineering Intern August 2018 – June 2021
Arrington Automation Houston, Texas

- Collaborated with a team of engineers to contribute to the design, testing, manufacturing, and integration processes of industrial control panels and control systems.

EDUCATION

Master of Science in Engineering (MSE), Software Engineering September 2025 – Present
The University of Texas at Austin

Bachelor of Science in Computer Engineering & Minor in Cyber Security December 2021
Texas A&M University College Station, Texas
